Meeting Thursday, November 8

Mining concentration:
- Are the top 5 a reasonable measure, or more options? Like top 3-6
- Update every 25k blocks precise enough? Change to 1 month or 3 month
- Update plots, which one do you like better? flow

Miner identification:
- time to redeem / output redeem, what do I do with them? What script / how to proceed?
- Updating for block 500k (email problem) → send log file
- Problem showed in email → simplified case?
- Differentiate 3 cases: Solo mining, mining pool direct, mining pool over 2 addresses
- Create a vector for the users who are miners with 1s for miners and 0 for non miners

Wealth accumulation:
- First look at wealth median? → Minimum wealth over 0
- Inequality: Besides Gini index, should I also look into top 1 and 5, 10, 20, 50, 80, 90 percentiles? First 1% :last 10%

Combining:
- look only at correlation? Which one? Rank based: Kendal Tao and not rank based: Pearson

Thesis questions:
- short_transactions, total bitcoin (correct it), is_sink / is_miner?
- List of new elements found newly
- Template formatting (title page, onehalf spacing, bibliography, citing (direct quotes, style))
- Application form
